Learning Finland? systemic challenges and OPPORTUNITIES

How can we FLOURISH in the future? (Not just survive)

How can we? **SPARK** curiosity!
Sense of CAPABILITY OWNERSHIP

WHAT BOX? transpire and transform

STATE of the WORLD
Loss of BIG DIVERSITY
DECLINING population
Climate change
SLIDING sea results
Innovation capacity?
All I see are THREATS.
Do we have the RESILIENCE to ADAPT?

CURRENT level of understanding

Oh but I'm not sure I understand all this...

Do we have the systems thinking capability in place?

GOVERNMENT? We can only ever operate from our state of understanding.

We tend to plan to BUILD a PATH instead of DISCOVERING A PATH in co-operation

Systematic AND SYSTEMIC

Challenging existing GOVERNANCE & POLICY models

- DYNAMIC
 - ADAPTIVE
 - COLLABORATIVE
 - SYSTEMS capability
- skills/sets

SOUNDS FLUFFY. What's the Excel formula?

We are VERY good at creating memorandum & plans. Less good at EXECUTION.

FISCAL FOCUS

Missing sense of URGENCY!

Can I see our government as a learning partner & running a "humble"/systemic governance? Hmm...

Learning Finland

EGO
Lack of persistence
Linear model
Group think

Unlearn
Inspiration
Dialogue
Trust
Respect
